Education

Manisa Celal Bayar University

Manisa · 2022 – 2027

Computer Engineering (English)

University of Zielona Góra

Zielona Góra/Poland · 02/2025 – 07/2025

Completed one semester of my education in Poland through the Erasmus+ Student Exchange Program, gaining international academic experience and strengthening my intercultural communication skills.

Namık Kemal High School

Tekirdağ · 2017 – 2021

Participated in the Germany–Türkiye School Exchange Program as part of the Sister School Project, gaining international experience and improving my foreign language and intercultural communication skills.

Experience

Dijital Arı

Remote · 10/2025 – 09/2026

Web Programming

- Contributed to mobile application development processes using Flutter and React Native.
- Fixed bugs in existing projects and carried out performance improvement and optimization tasks.
- Developed corporate websites using WordPress and managed content management processes.
- Integrated APIs to dynamically display backend data within mobile application interfaces.
- Developed modular and reusable frontend components using React (TSX) and made them manageable through a CMS.

Movliq

Remote · 05/2025 – 12/2025

Flutter Developer

- Contributed to the development of a running application supporting both live multiplayer and individual usage scenarios, where users could earn and spend in-app coins by completing tasks.
- Participated in a youth entrepreneurship program supported by Starbucks and various companies, establishing valuable connections with industry professionals and gaining experience in entrepreneurship.
- Developed the frontend of the application using Flutter, creating widget-based user interfaces and ensuring responsive designs adapted to different screen sizes.
- Conducted testing, bug fixing, and optimization throughout the development process and after the application's release.

Aktif Yazılım

Hybrid · 08/2025 – 09/2025

Summer Intern

- Learned the fundamentals of Microsoft SQL Server and worked on SQL queries, data management, and relational database structures. Applied my knowledge to sample datasets, reinforcing theoretical concepts through practical experience.

Leadership & Activities

LÖSEV Social Responsibility Project

2024

Participated in a social responsibility project organized as part of a university course, contributing to organizational and teamwork processes.

Projects

Corporate LAN Network Design (Final Design Project — Cisco Packet Tracer)

Designed a small-to-medium-sized business network consisting of server, accounting, user, and guest departments using VLAN segmentation, Inter-VLAN routing, and ACL-based access controls. Validated the network using ping and HTTP tests.

Mobile Application Development (Ongoing Projects) · GitHub

Developed three mobile applications using Flutter. One of them is currently in the Google Play Store publishing process; development continues on the other two. The backend of these applications is built using Python (FastAPI) and PostgreSQL.

Skills

Technical Skills

Flutter, Dart, Java, OOP, WordPress, Firebase, CMS, Git, GitHub, PostgreSQL, React, Python

Languages

English (B2)

Soft Skills

Project Management, Teamwork, Problem Solving, Communication
